

Eclipse Pro 10g Ozone Generator for High Performance Pathogen and Odour Neutralisation with Ozone Destruct Facility

109182 UOM: Each

● Available to Order

The Eclipse Pro has been designed with hi-performance, quick and efficient odour removal in mind. With its unique design feature of an automatic residual ozone destruct system in-built as standard, this machine is perfect for care homes, hotels, student accommodation and holiday lodges to name but a few.

Initially, the Eclipse Pro produces a specific amount of ozone dependent on the flexible cycle time that is chosen. The ozone will neutralise odours and pathogens in the air and on nearby surfaces by breaking down their molecular structure. The final stage of the treatment process is where the ozone destruct cycle gets to work in converting any residual ozone back into oxygen meaning that a room can be safely occupied again.

Your Eclipse Pro ensures that problematic odours are destroyed and not masked, which ultimately is all that scented air fresheners will do. An added benefit of the Eclipse Pro is that it does not use harmful chemicals and the ozone produced will freshen those difficult to reach areas within a facility.
