

Supermop Ag

Mop head contains silver to inhibit bacteria growth

Fast & effective cleaning

Ideal for spot mopping, spill pick up or intensive cleaning of small to medium floor areas, including bars, washrooms etc.

Improved Hygiene

The hygienic alternative to conventional cotton mops, with a unique non woven closed structure, now contains silver (Ag ions) anti-bacterial technology.

Independent tests* show it inhibits 99.99% of bacteria growth within the mop.

* *Leitat Technological Center, Spain*

New & improved

- New modern print design with Ag symbols
- Contains silver (Ag) anti-bacterial technology
- Zig Zag edges provide excellent absorbency and 30% better dirt pick up.
- Excellent dirt release unlike cotton mops which trap dirt.
- Colour-coded to prevent cross contamination
- Very high resistance to detergents and bleaches

Durable and ergonomic

- Low friction, lightweight non-woven material
- Long lasting, will not shed fibres or unravel
- Easy to wring, releasing water efficiently. Leaves floors drier and back in use faster.
- Machine washable at 60°C but can be washed up to 95°C
- New strong, lightweight 10L oval bucket & colour coded wringer is highly portable and easy to store
- The aluminium handle with improved attachment is lightweight yet robust, making it comfortable to use and easy to clean. Complete with colour coding clips.
