

# MICRO CLEAN

## BIOLOGICAL ODOUR & STAIN DIGESTER

**Used by professionals** to digest odours and stains left by animal soiling on **artificial grass** for a long lasting solution.

**Unique non rinse formula** - just apply to the soiled area and leave to dry naturally for a quick and simple solution!

**Clears build up fast** by breaking down and digesting organic soiling that traditional cleaners cannot.

- ◇ Used to treat mould on washroom surfaces
- ◇ Treat pet soiling with ease
- ◇ Digests organic stains
- ◇ Reduce the effect of tea and coffee stains
- ◇ Pour down the drain for long lasting freshness
- ◇ Use on fabric to digest stains
- ◇ Use in the car for rinse free stain & odour removal
- ◇ Breaks down food soiling in kitchens
- ◇ All round washroom odour eliminator
- ◇ Removes blockages from sinks & drains
- ◇ Cures odours
- ◇ Keeps kitchen grease traps and pipework clear
- ◇ Breaks down urine and bodily fluids
- ◇ Eliminates dried in blood stains
- ◇ Used to treat flood damage in buildings

**NON RINSE &  
HASSLE FREE!**

# MICRO CLEAN

## Biological Stain and Odour Digester

**Micro Clean is a probiotic biological stain and odour digester that will effectively degrade any organic soiling absorbed into carpets, upholstery fabrics and flooring material that most cleaners cannot remove.**

Highly effective on urine stains and odour, Micro Clean is also prevents odours in small bore pipes from sinks, baths, showers and from kitchen waste units in catering and food prep areas.

Micro Clean can also be used for pet stains on artificial grass and as a solution to flood damaged properties.

- Biodegradable
- Non harmful
- Economical
- Simple to use
- Neutral pH (6.5—7.5)
- Pleasant fragrance
- Suitable for use in septic tanks

### DILUTION

#### GENERAL CLEANING MAINTENANCE

(tiles around toilets etc)

dilute 1:1 with tepid water  
dilute 1:20 with tepid water

### PACKAGING

**Order Code: MC1**

Pack Size: 12 x 1 litres

**Order Code: MC5**

Pack Size: 2 x 5 litres

### DIRECTIONS

Shake container well before opening. Only activated by diluting with tepid (not hot) water and should be used within 3-4 hours. Dilute and sponge or brush onto contaminated area. Soiled areas need complete penetration. Cover with a damp cloth for maximum effect. Do not rinse. Allow to dry slowly. Pour a little directly into sink outlets to combat odours and blockages. Leave to work overnight. **Do not spray.\***

Test small areas of carpet/fabric for colour fastness before use.

### STORAGE

Stable for a minimum of 12 months if stored in the sealed original container out of direct sunlight.

Keep out of the reach of children.

# MICRO CLEAN

## Biological Stain and Odour Digester

### HOW MICRO CLEAN WORKS

When activated, the probiotic micro-organisms produce enzymes that quickly break down the waste. These particles of waste are more accessible for the bacteria to absorb. Each bacterium, having absorbed this food, becomes large enough to divide, becoming two identical bacteria.

This degrading process will continue for as long as there is support (food) available. When the food is depleted the bacteria will start to die off.

### APPLICATIONS

May be used to remove stains and cure odours caused by urine, dairy products, baby soiling, pet soiling, fruit juices, fats and cooking oil, wine and most soft drinks. Staining from tea and coffee can be permanent though may be reduced with treatment.

Use as directed to remove black mould, body fat, urine etc from tiled areas walls and floors in washrooms.

**\* Do not spray:** Micro Clean needs to be allowed to fully penetrate the offending area and a spray application is less likely to deliver sufficient product to the soiling.

This is likely in the case where treatment is to a deep pile carpet or tightly woven fabric for example. Whilst not classed as hazardous, the mist from a spray application is more likely to be inhaled or exposed to skin and the risk of irritation is therefore increased.

It is specifically designed for the eradication of stains and odour caused by organic soiling. Perfect for dealing with pet accidents on hard flooring, carpets, upholstery and fabrics. Activated with warm water and sponged or mopped onto the contaminated areas, leave to dry naturally to allow the bacteria to work fully.

Micro Clean will remove the problem rather than just simply masking the odours that return. Caution is to be taken when using on areas that pets frequent and their bedding. Always remove the animal from the area to be treated and exercise caution around animals when using any cleaning products and ensure Micro Clean is dry before returning the animal to the treated area.

# MICRO CLEAN

## TRIED, TESTED, TRUSTED - a testimonial:

*“Micro Clean is one of those products that works on most things, from smelly bins, mouldy milk as well as flooded properties to remove the bad bacteria from the walls and ceilings. Although we don’t know all of the technical wording we do know that from trying Micro Clean on flooded properties in the 2007 flash flooding that the enzymes quickly started eating through all of the nasty bacteria and damage caused by the floods. By simply splashing Micro Clean onto the walls and ceilings of a flooded property after mixing the product with lukewarm water it allows the enzymes to start working by removing all of the nasty things that the flood had caused. We always reapply Micro Clean a few times per property over a number of days just to ensure the property is ready for decorating, before allowing the homeowners to move back into their homes. Usually a flooded property would need plastering after a flood, however we find that Micro Clean does the job of removing the bad stuff, without having to replaster. When we work in a flooded property the property is always inspected afterwards by either the insurance, builders and even the local councils and thankfully we’ve never had a problem where the property needed more work. The only product that we would use on these properties is Micro Clean! “*
